

Product Excellence is Our Commitment:

Excellence drove us to set new standards. The performance of our products set us apart. We back-up our commitment to product excellence with an exclusive Transferable Limited Life-Time Master Warranty™ that can add value to your home.

Garage Doors Built for Exceptional Life-Time Performance

1. **Impact Resistance Steel Skin:** All our door panels are manufactured from high strength 24-gauge steel to protect against impact from airborne debris.
2. **Hot-Dipped Galvanizing Process:** Prior to manufacturing, our door's steel skin is submerged in a continuous molten zinc bath that completely galvanizes both sides of the steel panel to ensure against corrosion.
3. **Baked-On Primer Undercoat Treatment:** A baked-on primer undercoat is next applied to both sides of the steel skin to increase the door's performance against corrosion and improve paint adhesion.
4. **Flexible Baked-On Polyester Top-Coat:** Finally, a flexible baked-on white or almond colored polyester top-coat is added to provide a third corrosion barrier for years of maintenance-free performance.

Our commitment to product excellence is clear-cut. Our products will have no material defects or defective craftsmanship or DAB will resolve the problem. Our door systems are engineered to better resist the forces of nature. That's why DAB can offer its door systems with a timeless, Transferable Limited Master Warranty™ that passes from one homeowner to the next so long as the door remains installed on the property. Extending the manufacturer's warranty coverage to successive property owners distinguishes a home in a competitive market by providing each new owner an extra measure of quality assurance. For additional details on our warranty coverage, please refer to the product's written warranty or consult with your DAB dealer.

DAB garage doors are available in a variety of standard and custom door sizes to fit virtually any garage opening.
