

In Mt. Hope Ohio, Amish craftsmen hand-build some of the finest wood garage doors in the world expressly for your home. The Wayne-Dalton model 7420 and 7421 Wood Carriage House Doors combine the classic swing-open appearance and detailing of carriage house wood doors with the convenience of standard sectional garage doors.

step 1. Choose a design

The vertical shadow line grooves of Carriage House Doors preserve the look of swinging doors. Framing is made of solid (no joined pieces) kiln-dried hemlock. Mortise and tenon door sections are glued and steel-pinned. Windows are standard with model 7420 and model 7421. They are true divided windows with individual glass separated by one inch muntins.
